

# Facescreen

Help protect those protecting us from Covid-19 with Facescreen

Next day  
dispatch  
available

To further support the NHS and those fighting the spread of viruses such as Covid-19, Yewdale has released its Facescreen to complement its range of Disposable Curtains. This lightweight Facescreen protects the face and eyes from splashing or spraying or other infectious substances.

## Provides Protection:

It is essential that all medical staff are adequately protected. Facescreen provides full face and eye protection from splashing or spraying with a optically clear visor with maximum visibility.

## Environmentally Friendly:

Truly environmentally friendly, the visor can be replaced time after time, allowing the user to retain their head support.

## Germ resistant:

All components are easy to sanitise with a mixture of mild detergent diluted with water.

## Quick to Change:

Facescreen has the unique ability to replace the visor and only takes a matter of seconds to do!

## Comfort:

Built with the user in mind, this is a truly lightweight product.

## Specification:

Visor Film – 0.25mm, Anti-fog protection, Optically clear visor for maximum visibility, Lightweight design, Protects the face and eyes from splashing or spraying, Can be worn with/without facemasks and eyewear protection
